Grease	1-2	Grape Juice	1
Crayons	1-2	Olive Oil	1
Eye Shadow	1-2	Motor Oil	1
Chocolate	1		
Ketchup	1		
Baby Oil	1		

Day-to-day- soil:- Remove ordinary dirt and smudges with a mild soap and warm water solution. Dry with a soft, lint-free cloth or towel. For more difficult stains, use of a stronger detergent is recommended, however, follow the detergent manufacturer's instructions closely. For special cleaning problems the following steps are recommended. Many difficult stains can be removed when these cleaning agents are used in the following order.

Step 1 cleaners:- Non abrasive household bleached based cleaners such as Cif, Mr Muscle or similar household cleaners and bleaches, to be used with a soft cloth or damp sponge, following the manufacturer's instructions.

Vyva Cleaner is highly suitable for cleaning artificial leather. The cleaner is simple, quick and efficient to use. It is environmentally friendly and free of any ammonia or phosphates. The fluid is clear, unscented and is neutral in smell. It leaves no residue when used correctly. Can be used both daily and periodically.

When using Vyva normally, dilute 500 ml of the product in 5 litres of water (1:10).

Use a clean, white cloth or sponge for this, or the brush provided.

For stubborn stains you can apply Vyva to the surface undiluted. We recommend you use the brush provided to do this. If necessary, leave Vyva to work for a few seconds to give better results.

After every use it is advisable to rinse the surface thoroughly with a sponge or cloth that has been wrung out and will absorb moisture well. Rinse the sponge or cloth frequently with clean water.

Step 2 cleaners*:- Solvent-type cleaners such as Rubbing alcohol (isopropyl alcohol) or lighter fluid to be liberally applied with a soft cloth or damp sponge. Rinse cleaned area with fresh water and dry with clean cloth.

Step 3 cleaners*:- Strong, active solvent cleaners such as nail polish remover dissolved in 50% water (acetone/water) to be applied with soft cloth or damp sponge. Stain should be removed with less than six (6) rubs; if stain persists after six rubs, stain has set and it is unlikely that it can be removed. Rinse cleaned area with fresh water and dry with a clean cloth.

† **Note:** Although vinyls protected with Prefixx are resistant to most common stains, some fabric dyes have the ability to create a permanent stain. To minimise any problems from these and other stains, it is recommended that as soon as they are noticed all stains should be cleaned, making sure the recommended cleaning steps are followed in order.

* **CAUTION:** These solvents are highly flammable. Exercise proper care in cleaning. Wear Rubber gloves during all cleaning activity. Use caution cleaning around buttons, stitching and wooden or other decorative trim, since these solvents could seriously damage such areas.
