

SUNBRELLA® PLUS

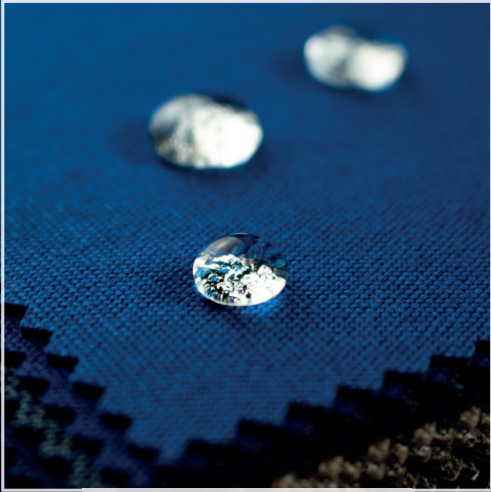

SUNBRELLA® PLUS : ADVANCED RESISTANCE TO THE ELEMENTS.

Sunbrella® delivers high-quality performance for resistance to extreme weather: sunlight, heavy rain, salt, humidity, snow, and hot and cold temperatures over long periods.

Available in a wide range of colours:

32 colours in 152 cm width and 6 colours in 200 cm width Sunbrella® Plus is the best choice to protect boats and their crews.

DISCOVER ITS EXCLUSIVE ADVANTAGES:

Dimensional stability

Made from high-resilience acrylic yarn, the fabric does not stretch over time and corrects the warp/weft imbalance found in all conventional acrylic fabrics.

Weather resistant

Sunbrella® Plus is designed to protect your boat from UV rays, rain, salt and humidity.

Comfort and breathability

Unlike some marine outdoor protection products (PVC), Sunbrella® fabric is breathable, mold resistant and prevents condensation in hot and humid weather.

Stain resistant and easy to maintain

Easy to clean, even when heavily stained.

UV resistant and colourfast

Made from 100% Sunbrella® acrylic (excluding coating), Sunbrella® fabrics stay vibrantly colourful even after constant exposure to sun, salt and chlorine.

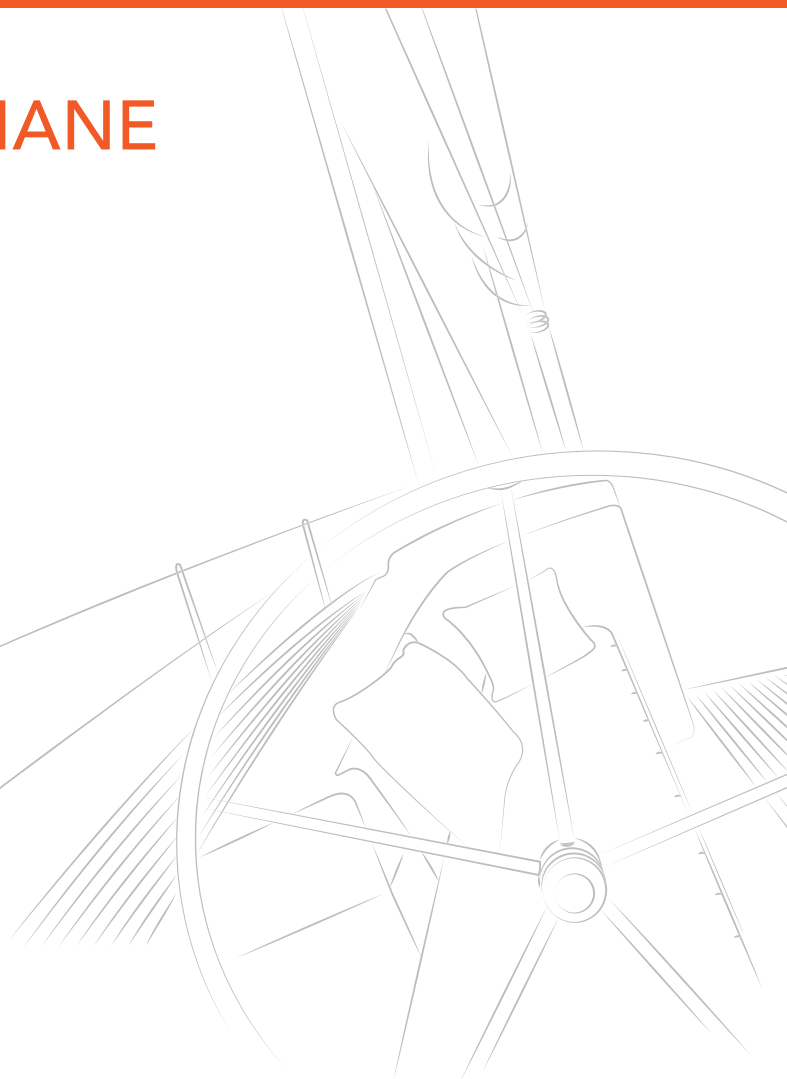

Personal and environmental protection

Sunbrella® Plus is certified STANDARD 100 by OEKO-TEX as meeting the latest environmental standards.

NEW POLYURETHANE COATING FOR ENHANCED PROTECTION

Thanks to the unique combination of our exclusive high-resilience Sunbrella® acrylic yarn which reduces stretching and sagging and the innovative and technically advanced PU (polyurethane) coating for optimal weather protection over time, the new Sunbrella® Plus is the best choice to protect your boat exteriors.

ADVANTAGES OF THE NEW PU COATING FOR RESISTANCE WHATEVER THE WEATHER:

Non-tacky and mold resistant

In hot and humid conditions, the surface remains dry and non-tacky and less prone to soiling and mold growth.

Resistant to micro cracking and flexible

Even at very low temperatures (-30°C) covers resist micro cracking for enhanced water resistance over time. Its flexibility makes it easy to roll and unroll the fabric in winter.

Heatweldable

Sunbrella® Plus is now heatweldable and HF weldable with a polyurethane-based welding ribbon to avoid stitching and related leaks.

USES:

Bimini

Bridge shelter

Winter cover

Windshield cover

Sprayhood

Console cover and
winch cover

Rear closure

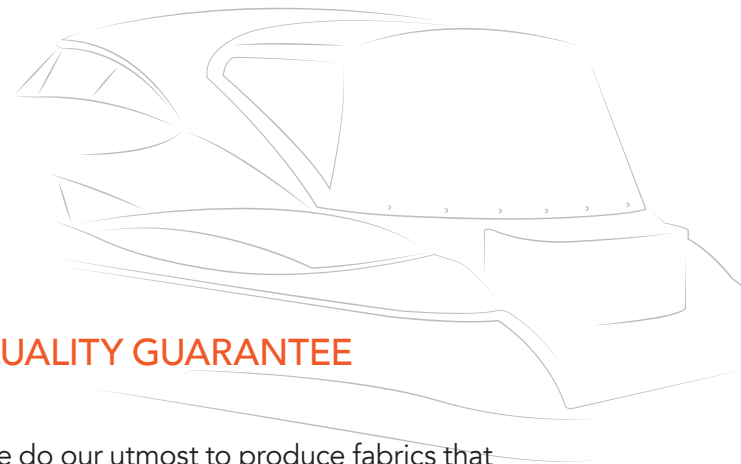

Wheel cover

QUALITY GUARANTEE

We do our utmost to produce fabrics that deliver all-round performance and long-lasting resistance.

This is why Sunbrella Plus fabrics come with a 5-year warranty against loss of resistance and colour fading after routine use and exposure.
