## FINISHES AND TREATMENTS PERMABLOK<sup>3</sup>®

Antibacterial Protection, Anti-stain Finish, Mildew resistant backing and face, Sulfide Stain Resistant, Anti-static Finish, EN 71-3 Safety of Toys (Migration of certain elements)

**Virucidal Activity:** ISO 18184:2019:<sup>1</sup>  
Coated Fabrics treated with PERMABLOK<sup>3</sup>® are proven to reduce the presence of Coronavirus\*\* by more than 90% within one hour of contact.

ISO 21702:2019:<sup>2</sup>  
All the Coated fabrics treated with PERMABLOK<sup>3</sup>® are capable of reducing the Coronavirus\*\* activity by 99,9% within 24 hours of exposure on the surface.

**Bacteriostatic Properties:** ISO 22196:2011. Value of antibacterial\*\*\* activity R>2

## SUSTAINABILITY

EcoSense, ISO 14001, ISO 45001, ISO 50001,  
Carbon Neutral, Greenguard, Indoor Air Quality Certified,  
REACH, RoHS, Phthalate Free  
Heavy Metals Free: AZO, CFC, HCFC, PCP, PCB, PCT, PBTs

## CARE AND CLEANING

For optimum care and cleaning please read the following instructions and recommendations.

### Disinfectant Use

The following information refers to the performance of PERMABLOK<sup>3</sup>® products in specifics tests, conducted under laboratory conditions. Results may vary under actual conditions:

- Asepticare TB + II • Antifect (in 0.5 % dilution) • Caviwipes XL Packed
- Cleanisept Wipes • Clorox Healthcare Bleach • Germicidal Wipes
- Coverage Plus Germicidal Wipes • Desomed rapid • FD 366
- Hydrogen Peroxide Cleaner Disinfectant Wipes • Instrunet Anionsurf
- Lysol Foaming Disinfectant Cleaner • Microzid • Oxivir TB Wipes
- Oxycede Diluted -3oz/gl in water • PDI Sani-cloth bleach wipes
- Sanicloth AF 3 • Sodium Hypochlorite. Disinfectant. Bletach cleaner.
- Dilution: 1:10 mix of bleach and water. • Surfanios Premium (in 0,25% dilution) • Surfa'Safe Premium (in 0,25% dilution) • Super Sani-cloth
- Virex II 256 (1:256 Dilution) • Virox 5 Rtu • Wet wipe • Wex Cide 128 (1:128 dilution)

Rinse the area with clean water, then dry with a clean, lint-free cloth after using any disinfectants and cleaners.

### Cleaning after Disinfection:

The coated fabric should be cleaned periodically in order to maintain its appearance and prevent build-up of dirt and contaminants. Any stain, spills, or soiling should be cleaned up immediately to prevent the possibility of permanent staining. Use a mixture of 1:1 liquid soap (neutral pH) and water or our approved cleaning products for coated fabrics to remove stains on the surface of the material. Completely remove excess cleaner with a white, clean, damp cloth; and dry the surfaces afterwards. Lacquers, strong cleaners, detergents, xylene-based solutions, acetone, or ketone (MEK) cause immediate damage and contribute to the deterioration of the material. The use of such cleaners is at the owner's risk.

### Cleaning methods to remove tougher stains

**Step 1:** Coffee, juice, red wine, sauces, chocolate, grease, crayon and suntan lotion. Remove excess spill with a damp cloth. Clean with a 1:1 mix of neutral liquid soap and water. Next, rinse with clean water and dry.

**Step 2:** Make-up Use a straight application of neutral PH soap. Wipe with a clean white cloth or soft brush, rinse with clean water, and dry.

**Step 3:** Blood, urine, faeces and all other tough stains Use a 1:10 mix of Isopropyl alcohol and water. Rinse thoroughly with clean water and dry.

For cleaning: use a soft white cotton cloth saturated with the recommended cleaning agent and rub the stain in random circles, ten times or more. Pat dry with another soft white cotton cloth and check the results. Do not use steel bristle brushes, abrasive scouring pads or metal, these cause permanent damage to the fabric. Methods 2 & 3 are not recommended for everyday cleaning! After cleaning, rinse the area with clean water, then dry with a clean, lint-free cloth. Failure to remove chemical residue will cause discolouration of the coated fabric surface to manifest itself earlier in the life cycle of the product.
