CARE AND CLEANING

For optimum care and cleaning please read the following instructions and recommendations.

Upholstery that has been coated with PreFixx protective finish, is designed to be cleaned easily, over and over, without showing signs of wear. Most common stains like dirt and smudges simply wipe off. Many difficult stains like ballpoint ink can be cleaned with active solvents such as nail polish remover without damaging the PreFixx finish, when following the recommended cleaning instructions.

Cleaning after Disinfection:

The following cleaners should be used with a soft cloth or damp sponge to remove chemical residue.

- Vyva Cleaner or Formula 409® All-Purpose spray cleaner
- Hand dishwashing soap and water

After cleaning, rinse area with clean water, then dry with a clean, lint-free cloth. Failure to remove chemical residue will cause discoloration of the coated fabric surface to manifest earlier in the life cycle of the product.

Cleaning methods to remove tougher stains

Step 1: Coffee, juice, red wine, sauces, chocolate, grease, crayon and suntan lotion. Remove excess spill with a damp cloth. Clean with a 1:1 mix of neutral liquid soap and water. Next, rinse with clean water and dry.

Step 2: Make-up. Use a straight application of neutral PH soap. Wipe with a clean white cloth or soft brush, rinse with clean water, and dry.

Step 3: Blood, urine, faeces and all other tough stains. Use a 1:10 mix of Isopropyl alcohol and water. Rinse thoroughly with clean water and dry.

For cleaning: use a soft white cotton cloth saturated with the recommended cleaning agent and rub the stain in random circles, ten times or more. Pat dry with another soft white cotton cloth and check the results. Do not use steel bristle brushes, abrasive scouring pads or metal, these cause permanent damage to the fabric. Methods 2 & 3 are not recommended for everyday cleaning! After cleaning, rinse the area with clean water, then dry with a clean, lint-free cloth. Failure to remove chemical residue will cause discoloration of the coated fabric surface to manifest itself earlier in the life cycle of the product.
